## Automatic Umbilical Clampcut

It is a plastic clamp made of polypropylene that blocks the blood flow of the mother and baby through the umbilical cord automatic cutting

- Manufactured from medical grade material
- Minimizes the risk of transmission of infections and diseases by no using reusable tools for clamping and cutting the umbilical cord
- Indirect contact with umbilical cord blood and minimum risk of transmission of infection and disease
- Ease of use and comfort of the staff of the maternity and operation room
- Eliminating the cost of sterilization and exhaustion of tools and reducing hospital costs

Automatic Umbilical  
Clampcut

This product has manufacturing certificate by the Ministry of Health

Final package of product is in a poly bag or a blister pack
